State-of-the-art
Skin Immunity
Systems

ANACCELL™
BIOINTELLIGENCE

1. Understand Your Skin & Scalp Problem

We are responsible for making the following major errors :

Error N° 1 We use chemical-based products that are not biodegradable in the environment and inside our bodies. The list of chemicals in section 3 are dangerous for health.

Error N° 2 We don't understand the real needs of our skin, and we don't know where to learn to do that.

Error N° 3 We don't question our approach to skin and hair care, we don't change our daily routines.

Error N° 4 Our purchase decision is more based on what looks, feels and smells right, rather than on the true healing capacity of the products.

Error N° 5 We like to hide our problems and to cover the blemish with more pollutants.

Conclusion:

We are aggressive with our skin, our hair and our scalp. It is important to understand that the skin and the scalp are an integral part of the immune system which is constantly exposed to aggressions of all kinds (cigarette smoke, alcohol, environmental pollution, chlorine (in tap water), stress, bad diet, infections, molds and chemicals). However, most of these pollutants are very difficult avoid and cause allergic reactions, which is an immune response signaling the presence of poison or antigen. Learn to analyze the allergic reactions and take control over your health and beauty this way.

2. Analyze The Problem

How do you know if your skin, scalp or body have been poisoned? This is :

- When you wake up one day looking older, tired and worn out.
- When you have inexplicable dryness and break-outs on your face.
- When the skin has become sensitive and allergic to nearly everything including day light (sun) and water (tight feeling, itchiness, burning feeling even with cold water).
- When the lines and wrinkles don't smooth out by the end of the day, no matter what you apply.
- When your scalp continuously itches.
- When your hair falls out for "no reason" or turns white.

That is when the skin and the scalp have decided to give up. The degradation begins very slowly and is hardly unnoticeable, but one day we seem to have seriously aged, before time. The skin and the time are not responsible for aging. You are! Therefore the skin

and scalp will not function properly, **until you do!**

3. Attack The Problem

The problem is temporary unless you make it permanent with your own hands...

...by using products that contain the following list of toxic, poisonous and carcinogenic ingredients that you find in nearly all products:

1,4-dioxane, 2-bromo-2-nitropropane-1,3-diol (Bronopol), Alcohol, Isopropyl (SD-40), Ammonium Laureth Sulfate (ALES), Ammonium Lauryl Sulfate (ALS), Anionic Surfactants, Benzalkonium Chloride, Butylated Hydroxyanisole (BHA), Butylated Hydroxytoluene (BHT), Triclosan, Acetyl Salicylic Acid, Parabens (preservatives), Propylene Glycol, Mineral Oil, Cocamidopropyl Betaine, Aluminum, Dimethicone... just to mention a very few. There are hundreds, yes hundreds more.

These ingredients should not be in your skin care products. They are absorbed by the skin and the scalp, they penetrate our bodies through the bloodstream. They are stored somewhere and form a heap of metals, plastics and chemical salts that no organ in the body can process, until they are removed under the form of a cancer tumor.

Anacell's Golden Rule

The golden rule to remember is **"if you can't eat it, don't apply it on your skin too"**, or at least not on a continuous basis. What you need are 100 % natural products, tailor-made for your specific needs, and with a satisfactory price/quality/quantity ratio. That is what **Anacell™** brings for you.

New beginnings with the ANACCELL™ Skin Immunity Systems

The **Anacell™** Laboratory has already achieved fast and astonishing results and has already delivered high satisfaction with a test group of customers who have used our essential oil-based products that do not contain any of the above mentioned chemical ingredients. Yes, you can reduce wrinkles, spots, dryness, psoriasis, eczema with natural ingredients... You can even reverse the time. Here is how Anacell™ can help you make a new beginning:

4. The Anacell™ approach to health & beauty

What you need is to restore your skin's ecosystem may be out of control. The **Anacell™ Skin Immunity Systems Program** will help you offer your skin and scalp a sabbatical year with a profound and personalized detoxifying treatment program to:

1. Reset the skin's ecology, and to make it receptive for the best treatments your money can buy.
2. Reconnect with the source of life and **use 100 % natural products**, of edible quality rather than perfume quality.

- Reverse the logic of most cosmetic brands and train your skin to use up hydration (water) from the inside, and absorb nutrition (oils) from the outside to form a balanced acidic mantle. Stick for a while with the oil-based solutions exclusively until you have healed the damages on your skin.
- Follow the Nature's four seasons rhythm and renew your formula at the beginning of each season (view table)

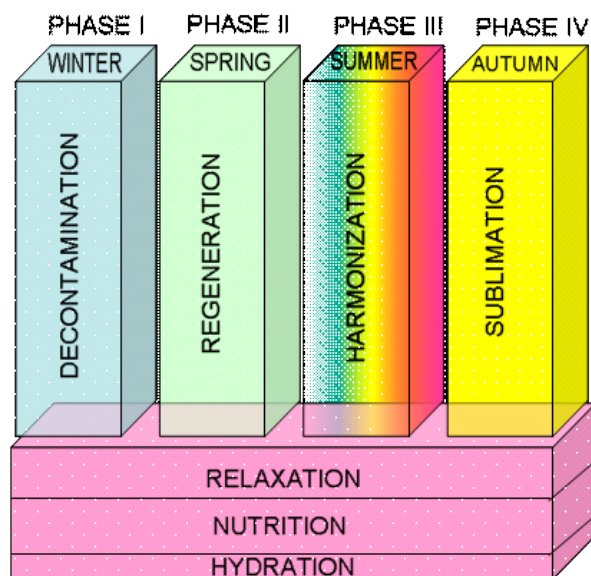

Conclusion:

With the **Anacell™ Skin Immunity Systems Program** in combination with a healthy diet and lifestyle, you will radiate a happy glow that only other people notice, children and infants in particular. That is the achievement of beauty in essence.

5. How the Skin Immunity Systems work

The Anacell Skin Immunity Systems program consists of four steps:

- Organic Decontamination (preferably in the Winter)
- Organic Regeneration (preferably during Spring)
- Organic Harmonization (preferably in the Summer)
- Organic Sublimation (preferably in Fall to look good for work)

At the end of this program the skin or scalp will have found it's original strength, shape, and resistance. The PH balance will be restored and the skin will become more receptive to high quality beauty treatments, which would be a waste money without a prior process of profound cleansing.

The Anacell™

Skin Immunity Systems Program

Phase	Graph	Treatment	Time of Year	Action	Benefits
One		Organic Decontamination (mandatory)	Winter 	Profound cleansing and healing of inflammations and lesions by old or new infections	In this phase the skin will learn how to produce it's own protective fluids.
Two		Organic Regeneration (recommended)	Spring 	Relaunching the skin's own cell production mechanisms.	In this phase the skin renewal system is triggered and accelerated.
Three		Organic Harmonization (recommended)	Summer 	Balancing the different functions of the skin to achieve and maintain a normal PH level	In this phase, a perfect balanced ecosystem is managed by optimal nutrition, hydration, micro-circulation and oxygenation of the skin.
Four		Organic Sublimation (optional)	Fall 	Stabilizing the skin's re-established defense system.	At this point, the skin will have found it's original firmness, softness, tone and clarity. In this phase one can think about other enhancements like rejuvenation, lifting, etc.

Customization services

To achieve an ideal product for you, the Anacell Laboratory investigates with you directly to analyze your skin, scalp, nails and overall health. The products will be adapted to answer your precise needs. Contact laboratory@anacell.com for information.
